### **[Abstract Title]**

Healthcare Continuity During COVID-19 Pandemic in New York

### **[Abstract]**

The Federal Emergency Management Agency and Healthcare System in New York have always prepared for All-Hazards and collaborated with Centers for Disease Control and Prevention (CDC) and World Health Organization (WHO) in preparing for Emerging Infectious Disease outbreaks. In 2019, an estimated 4.54 billion airline passengers were boarded by the global airline industry, intensifying the rapid spread of emerging coronavirus infectious disease globally.<sup>1</sup> The COVID-19 pandemic shocked the world as millions of people got infected with deaths by the thousands. This article intends to tract the COVID-19 timeline from Ground Zero in China to New York and discuss how the United States White House Corona Virus Task Force, Federal Emergency Management Agency (FEMA), New York State Officials, New York City Public Health and Hospitals prepared for, responded and supported Healthcare Continuity during COVID-19 Pandemic.
